# LEGAL DISCLAIMER

A participant in EvenCoin activity acknowledges that regulatory authorities are scrutinizing businesses and operations associated to Cryptocurrencies in the world. Thus, purchasers and anyone undertaking to acquire EvenCoin tokens agree that neither EvenCoin nor any of its affiliates or representatives shall be held liable for any direct or indirect loss or damage caused by such restrictions, prohibitions or changes arising therefrom.

At all times, this white paper shall not and cannot be deemed or considered as an enticement to participate in the EvenCoin activity or investment. It shall not be construed or amount to offer of securities nevertheless. The information expressed in this white paper should not be considered as a suggestion, approval or incitement for any investment decision. EvenCoin tokens are merely utility tokens which can be used only on the EvenCoin platform and are not intended to be used as an investment.

The presence of EvenCoin tokens on a trading platform is made to enhance the use of the Coins/tokens on EvenCoin platform and not for speculative or Investment purposes. The presence or offering of EvenCoin coin tokens on a trading platform shall not alter the legal qualification of the tokens, which remain a simple means for use only on EvenCoin platform and are not security.

EvenCoin is not a financial intermediary and makes no such representation pursuant to any Local enactment in any State all over the world and is not required to obtain any permission for Anti Money Laundering purposes. Participants/Purchasers of Evencoin tokens hereby agrees also that the EvenCoin Corporate entity and its management team shall not be liable or responsible for any loss or damage that may occasion from or relate to the incapacity to use of EvenCoin Coin tokens.

# INTRODUCTION

The generally accepted description of cryptocurrency is seen as a digital asset designed to serve as a medium of exchange for goods and services just like fiat currencies such as Dollars, Euros, and Pounds, etc. However, cryptocurrency is not regulated or controlled by any government or central authority. It uses cryptography to secure its transactions, manage the creation of more units of the currency and verify transactions.

After the introduction of Bitcoin in the year 2009, Altcoins (alternatives to bitcoins) started taking over the spotlight in the market. These altcoins were each designed to solve a particular problem which the existing market created by the blockchain technology has created.

With over 11 years of the popular existence of the cryptocurrencies and the blockchain technology, it is certainly evident that the future of finance and the transitional implications of money, lies within the blockchain technology. The blockchain technology serves its purpose of improving the usability of improving our ease of carrying out financial transactions both locally and internationally.

A study from Statista shows that the blockchain industry within the years 2016–2021 is and will be sitting at a whopping \$339.5 billion as at the year 2017. This figure quickly rose from about 5.6 billion to over \$160 billion dollars.

The ever-growing market continues to experience the emergence of new altcoins with different portfolios every day. Some of which are actually useful to the fundamental sustenance of the blockchain industry, others, not so much.

EvenCoin is a hybrid project that doesn't only require on the crowdsale of her tokens, but on valid investments and other relevant projects for her growth in order to ensure stability in the ever-growing market.

## INDUSTRY OVERVIEW

The Blockchain technology now cuts across several industries, from the banking industry, to the mining industry, to real estates, to travel and tourism. With quite a number of cryptocurrencies with different project portfolios swarming into existence on a daily basis.

The market is currently worth over \$160 billion dollars although the market has lost quite a lot of value within the last 6 months, but experts speculate that the worth of the market has the capacity to rise to over twice the formal market value. This is solely because the number of companies who are directly involved in the creation of more cryptocurrencies is definitely on the rise daily.

Currently we have over 1,658 functional cryptocurrencies globally and that figure continues to increase rapidly as the understanding of the blockchain technology and its usage continues to improve over the years. With each cryptocurrency looking to solve a particular problem with its project.

## PROBLEMS

The number of problems that has been spotted with the blockchain and the traditional coins which make use of the ERC-20 algorithm is immense.

### Insecurity

Despite the amount of security that is provided by the blockchain technology, it is still quite alarming that the number of cryptos which have venerable platforms which are not capable of leaving the data of users carelessly.

### Ambiguous Platform

Some of the platforms hosted by these crypto currencies are just way too complex for some individuals to understand what is going on.

### Poor Support

Most crypto currencies do not respect the fact that some users may experience difficulties in the course of making use of these platforms and as such may need some sort of extra attention.

## OUR SOLUTIONS

Evencoin, having gone through a descriptive survey that reveal the various issues that users face when making use of existing platforms. With the information gotten from these surveys, our team of elites was able to pull together a working plan that will ensure that we do not repeat the very problems that these other platforms have failed to solve.

### Hybrid security

Our platform employs the best security the customizable blockchain technology can accommodate. We ensure that information about every user is treated without discrepancy. This helps us to ensure that the data of our active users is not treated with laxity but with extreme prejudice.

### Active support

We understand that there are exceptional cases every once in a while, that even the smartest of users will not be able to solve on their own without the help of a tech support again at the backend. As to that regards, we have a 24/7 fully active dedicated customer care.

### Cheap Transitional fees

Evencoin will only charge a fraction of the worth of your total transactions. Compared to other platforms, we have a relatively cheap fee rate.

## OUR SOLUTIONS

### User friendly interface

We ensured to optimize our platform to be all user friendly. Even users who were new to crypto currencies won't really have a difficult time adapting to the interface.

### Portfolio Backed project.

The growth of our token is not solely dependent on the success or failure of our crowdsale alone, because of our highly esteemed business model.

Holders of our token will continue to enjoy a steady increase in the value of our tokens because of the business-based nature of our token. Our team of entrepreneurs constantly keep making research of what other investment to make in order to ensure the survival of the project.

## BUSINESS MODEL

Evencoin supports a hybrid business module, runned by her team of entrepreneurs who are constantly researching into the nature of the market, and as well the nature of investments that need to be made in other to ensure that the value of our tokens continues to be on the rise.

Knowing the distributed economy, tokens are at the core of a project. Since presenting EvenCoin, we've had many interesting conversations about creating tokens that harness the full power of the distributed businessmodel.

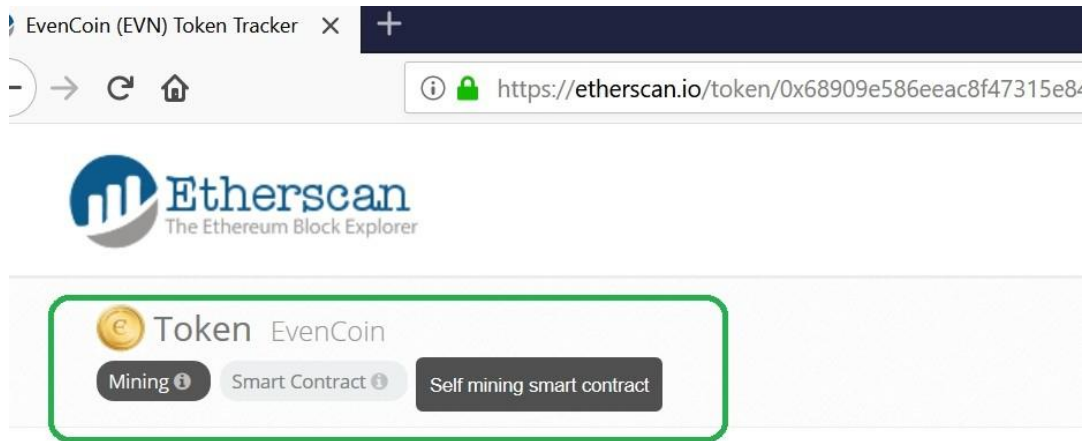

A well-designed currency increases in value along within the network. It incentivizes the community and early adopters to use, participate, spread and evangelize the platform that it represents. This bootstraps a global community where everyone shares incentives to make the project grow and succeed, while also enriching their personal interests as well.

Evencoin makes it possible to make such international transactions as transferring of funds internationally. The ease of the process makes Evencoin a much better choice to consider while transferring funds across to family and loved ones across the globe.

Evencoin will also support an integrated blockchain powered ecommerce platform within which merchants and users can come together in other to ensure that EvenCoin would support a blockchain based E-commerce platform for where anyone with small / big deals, products, services, tangible, intangible items would commence a international trade. EvenCoin would offer such trade & transaction with a highly reliable blockchain based on Escrow method which would protect buyer as well seller from any unwanted fraudulent trades.

## MINING PROCESS

As stated earlier EvenCoin, being self-mining smart contract does not require any mining hardware, the mining runs parallel to Ethereum even numbers of blocks for over 15 years by 4000 pre- selected miners only.

From all contributors towards crowdsale only 4000 top contributors / coin holders would be considered as hard core genesis and would receive mining share of 85% remaining supply mined at each Ethereum even number of block as for 15 years, as show in below chart, so mining of EvenCoin never depreciates.

Each miner gets rewards per even number of Ethereum block to his ether address immediately this is how the best ever smart self-mining works. EvenCoin mining makes complete fair distribution of mining rewards towards all genesis accounts.

## EVENCHAIN

		
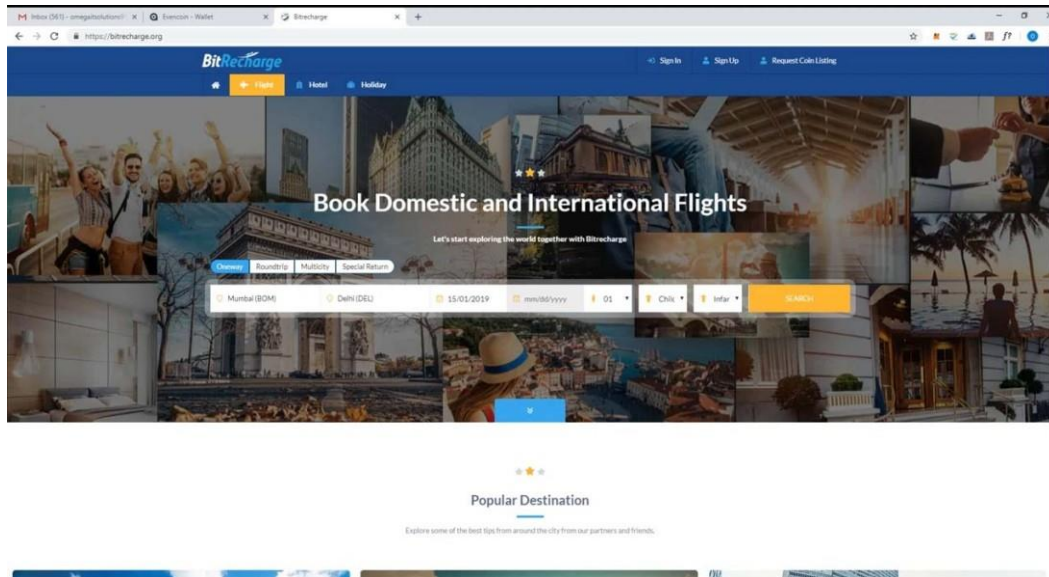

Bitcoin (BTC)	Ethereum (ETH)	Evencoin (EVN)
8547.2400\$/B	521.1500\$/E	0.095\$/EVN
0.01145000 B Confirmed Balance	0.05867495 E Confirmed Balance	328.0000 EVN Confirmed Balance
<a href="#">Deposit</a> <a href="#">Send</a> <a href="#">Transactions</a>	<a href="#">Deposit</a> <a href="#">Send</a> <a href="#">Transactions</a>	<a href="#">Deposit</a> <a href="#">Send</a> <a href="#">Transactions</a>

Evenchain is basically a crypto wallet that supports bitcoin, ethereum & evencoin as of now & soon going to list more crypto currencies.

Evenchain is a highly secure multi crypto wallet with 2FA authentication, anti Ddos attack, cold wallet storage making it most secure wallet in market. User can view transaction history with block explorer respective links, download history in PDF, Excel, etc for further use.

# BITRECHARGE

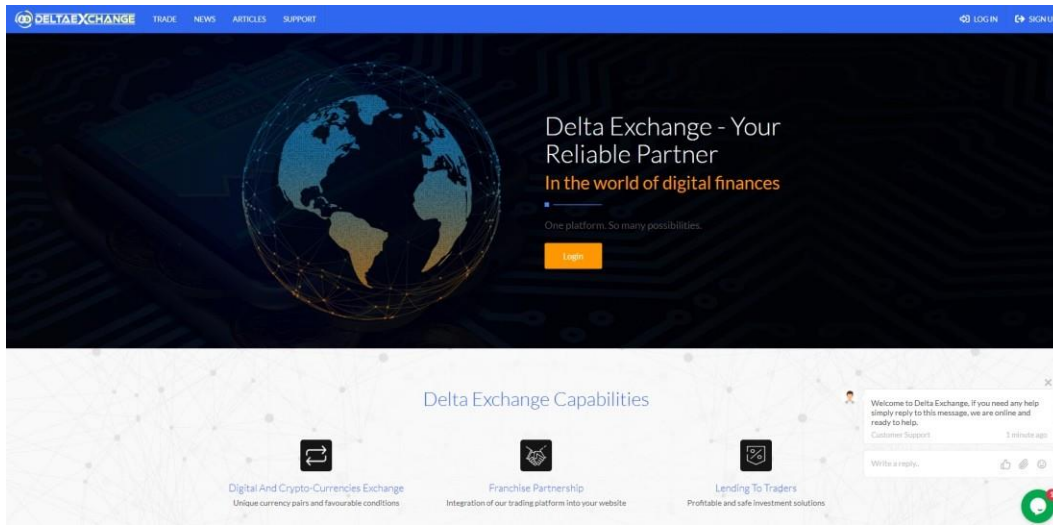

BitRecharge has created an eco-system for uniting crypto currencies and our e-commerce platform into a single hood. With BitRecharge users can book domestic & international airlines & hotel tickets with the best pricing available in the market. BitRecharge has collaborated with Gallio server's API to offers Mobile recharges, Electricity payments, DTH cable tv payments, coupons for online food ordering, offline shopping coupons, etc.

BitRecharge will enable the mass-adoption of cryptocurrency with the general public. The BitRecharge platform accepts both major cryptocurrencies and fiat currency in exchange for travel & tourism services, exposing the global population to the benefits of cryptocurrency as a method of payment.

# DELTAEXCHANGE

On the Upcoming list is the DeltaExchange Single exchange to offer Crypto currencies and Forex under single platform. DeltaExchange to offer its services for trading in over 184 countries with its office being setup in over 11 countries around the world.

Users can trade crypto currencies for as low as 0.05% fees and forex with spread starting from 0.1 pips lowest in market and when traded with EvenCoin fees are absolutely waived off!

DeltaExchange offers easy deposit, withdrawals and trade using crypto currencies as well fiat currencies and e-currencies like Neteller, Skrills, Perfect money and many more with possibly the cheapest fees across the industry.

With initially listing of top 40 currencies from CoinMarketCap, DeltaExchange would list more community based crypto currencies week by week.

## MEDTROX

Medtrox is a project of EvenCoin and is the first ever project which provides healthcare system using crypto currencies in real time. Medtrox is an online healthcare platform which connects with healthcare professionals and their services as per availability.

Using Medtrox, patients or normal users can search, find, and book appointment and consult online with medical specialist in a few easy steps. Medtrox can be used for purchasing insurance. Medtrox can be used to book ambulance or driving directions to nearest health care system. Also doctors can schedule appointments, access patient's health records, bills and prescriptions.

## GOALS

In the distributed economy, tokens are at the core of a project. Since presenting EvenCoin, we've had many interesting conversations about creating tokens that harness the full power of the distributed business model.

A well-designed token increases in value along with the network. It incentivizes the community and early adopters to use, participate, spread and evangelize the platform that it represents. This bootstraps a global community where everyone shares incentives to make the project grow and succeed.

### **Technology on Export/Import using EvenCoin:**

The EvenCoin Blockchain can benefit the SMEs or the Exporters/Importers in the following manner:

- Cutting down the fraudulent activities involved in cross border export/import documentation and also reduce cost.
- Trade values are transferred securely with the digital ledger uniqueness.
- Privacy on trade data is ensured through cryptography and tokenization.
- Flawless execution of contract between the exporter and importer because of Ethereum SmartContract.
- Escrow funding executions for cut down fraudulent activities

Some of the most intense discussions we had among the team, with our advisers and with potential supporters revolved around value return — should we do it and, if so, how it should be done.

In the end, we decided against pure direct value returns. EvenCoin is a platform and, most value will be created when building and leveraging the networks of projects, supporters and experts. We feel that this leads to unnecessary regulatory complexity and unaligned incentives — the supporters wish to keep costs down to increase returned value, which is counter-productive to rapid platform development.

Using the profits to speed up platform development, geographical and market penetration has the potential to bring multiples of value spent. For example — a \$10 Million profit would be miniscule when distributed among the token holders, while that same amount spent on an additional developer or a publicity campaign would bring much more value to the platform and indirectly to token holders.

That said, additional EvenCoin tokens will have to be bought on the market to fuel the crowd funded processes on the platform —for example, paying crowd sourced project evaluators. Once the platform is operational, the token flow should operate in a closed cycle, with an equal number of tokens leaving and arriving on the platform. But until that is complete, the team will have to “fuel” specific functions using the tokens bought on the open market

## FUTURE PLANS OF EVENCOIN

- With its upcoming project Medtrox evencoin is looking forward to sell insurance worth 30 million in upcoming days.
- EvenCoin is soon going to integrate blockchain into real estate. If blockchain is used in real estate, it will potentially change the way builders, and realtors do the business.
- Evencoin is targeting a turnover of 70-80 million including its entire projects.
- Evencoin expecting a 16-18% of profit from its projects.
- Evencoin is also introducing new opportunities for its users which will help to reach its targeted price of 2.5\$ by the end of 2019.

## EVENCOIN TOKEN

The Evencoin token (EVN) will and shall be used within the platform at its earliest stages but as we progress with the project it will be listed on as many exchanges as possible. This will help our users to have the ability to trade our tokens for other existing tokens including bitcoins.

The transactionary and value flexibility of our tokens shall be solely based on the amount of business investments made under the name of the project. The users of this tokens will also have a fair say in how the tokens are runned and controlled.

### TOKEN DETAILS

Name: -	EvenCoin
Short name: -	EVN
Contract Address: -	0x68909e586eeAC8F47315e84B4c9788DD54Ef65Bb
Total supply: -	100,000,000 (100Million)
Total Pre-mined:-	15,000,000 (15Million)
EvenCoin development hold: -	5,000,000 (5 Million from pre-mined only)
Available for crowd sale: -	1,000,000 (5 Million from pre-mined only)
To be Mined: -	85,000,000 (85 Million)
Time for mining: -	15 years
Total Genesis: -	4000 only

# ROADMAP

## **Q1 2017 –**

Getting ready with unique differential mining ideas, building team, registering domains, etc.

## **Q2 2017 –**

Deploying Evencoin-Smart mining contract and testing for every possible outcome.

## **Q3 2017 –**

EvenCoin Sale Started

## **Q4 2017 –**

End of sale & exchange listing

## **Q1 2018 –**

Listing on more exchanges & Launch of Evenchain

## **Introducing profitable projects of Evencoin**

## **Q2 2018 –**

Launch of Bitrecharge - Travel portal & getting bookings from Thailand, Dubai, & many other countries from Asia.

## **Q3 2018 –**

Evencoin listed on coinmarketcap with 4 exchanges & 7 markets

## **Q4 2018 –**

Launch of DeltaExchange a crypto exchange with initial listing of top 40 crypto currencies.

## **Q1 2019 –**

Evencoin saw a rise of 1200% in price

## **Q2 2019 –**

Introducing New Online Health Platform using blockchain i.e. Medtrox

## **Q3 2019 –**

Coming up with new project to introduce Blockchain into Real Estate

## **Q4 2019 –**

Targeting to reach a price of 2.5\$ per EVN

## TEAM

### **Mr. Di Martino Mario (CEO)**

Mr. Di Martino Mario is the Chief executive officer of Even Fintech Solutions. He has over 25 years of experience in the IT services industry, with deep operational knowledge and broad strategic insight in building and scaling businesses. He is an advocate of change and believes simplification of processes, belief in people and customer centricity is the key to success.

### **Mr. Dave Wilson (CMO)**

Mr. Dave Wilson is the chief marketing officer of Even Fintech Solutions. With over 12 years of experience, Dave has held senior positions at various companies including CMC, Citicorp, Zensar and in leadership roles across HR, global business operations, marketing, sales & delivery, consulting and M&A. he has led organizational transformation, headed strategy & corporate development and has been responsible for several large deal acquisitions through planned strategic investments.

### **Mr. Biman Das (CTO)**

Mr. Biman Das is the chief technical officer of Even Fintech Solutions. He has Management degree in Business Finance. His tenure has seen the Group expand domestically and internationally into a range of major industrial sectors with over 15 years of experience, Dave has held senior positions at various companies including IBM, google, L&T Infotech. He has been driven by one fundamental business idea – to build an organization deeply committed to Values with the Client as the focus of all efforts.
